

### Creekside Park – Construction Update

The sediment removal process at the sediment control pond is complete, and Urban Drainage and Flood Control District has started construction of a reinforced trail from the parking lot down to the pond area.

The reinforced trail is designed to withstand the weight of the heavy trucks and equipment for future sediment removal projects. Construction of the reinforced trail is expected to take about another two weeks.

Please exercise caution around the construction area. A portion of the Piney Creek Trail may be closed to accommodate this work.

Once the reinforced trail is complete, Urban Drainage will then begin making repairs to the irrigation system and landscaping within Creekside Park, and will make any final repairs to the parking lot. We are hopeful that the entire project will be complete by the middle of September.
