

### Creekside Park – Construction Update

As you may have noticed, Urban Drainage and Flood Control District is currently removing sediment from Piney Creek within Creekside Park. They anticipate that this sediment removal process will take an additional four weeks. The entirety of the Piney Creek Trail within Creekside Park will stay open throughout the sediment removal process, but please exercise caution around the heavy equipment.

Once the sediment removal process is complete, Urban Drainage will then begin construction of a reinforced trail from the parking lot down to the ponding area, and will also be making repairs to the irrigation system and landscaping within Creekside Park.

If you have any questions please email them to [clekahal@wbapc.com](mailto:clekahal@wbapc.com). Thank you.
